TABLE OF CONTENTS

		PAGE
Soil temperature versus drought as a factor determining lower altitudinal limits of trees in the Rocky Mountains	*R. F. Daubenmire*	1– 13
Effects of nutrient, photoperiod, and night temperature on the development of guayule seeds	*M. R. Whitehead and J. W. Mitchell*	14– 24
Histological studies on parthenocarpic fruits of *Lilium regale* induced by growth substances	*J. M. Beal*	25– 34
Vegetative propagation of *Taraxacum kok-saghyz* with the aid of growth substances	*P. C. Marth and C. L. Hamner*	35– 48
Effects of high temperature on metaphase pairing in *Lilium longiflorum*	*S. L. Emsweller and Philip Brierley*	49– 57
Cell growth and nucleic acids in the pollen of *Rhoeo discolor*	*T. S. Painter*	58– 68
Histological comparison of cucumber fruits developing parthenocarpically and following pollination	*J. O. Young*	69– 79
Effectiveness of growth substances in delaying abscission of *Coleus* petioles	*F. E. Gardner and W. C. Cooper*	80– 89
Development of the fibrous net in the fruit of various races of *Luffa cylindrica*	*E. W. Sinnott and Robert Bloch*	90– 99
Effects of photoperiod and temperature on growth and development of kok-saghyz	*H. A. Borthwick, M. W. Parker, and N. J. Scully*	100–107
Secondary association of fragment chromosomes in generative nucleus of *Tradescantia* and its bearing on their origin	*C. P. Swanson*	108–112
Provitamin A and vitamin C in the genus *Lycopersicon*	*R. E. Lincoln, F. P. Zscheile, J. W. Porter, G. W. Kohler, and R. M. Caldwell*	113–115
Morphological and cytological studies on *Carica papaya*	*Lois T. Foster*	116–126
Responses of *Elodea densa* to growth-regulating substances	*L. J. King*	127–151
Effects of osmotic concentration of substrate on the entry of water into corn roots	*H. E. Hayward and Winifred B. Spurr*	152–164
Growth and development in range grasses: III. Photoperiodic responses in the genus *Bouteloua*	*C. E. Olmsted*	165–181
Effects of growth-regulating substances on propagation of goldenrod	*C. L. Hamner and P. C. Marth*	182–192
Structure and development of *Symphyogyna brasiliensis*	*A. W. Haupt*	193–201
Origin and development of embryos in certain apogamous forms of *Dryopteris*	*R. E. Duncan*	202–211
Anatomical and chemical aspects of abscission of fruits of the apple	*Monroe McCown*	212–220
Cytological observations in citrus: III. Megasporogenesis, fertilization, and polembryony	*Oswaldo Bacchi*	221–225
Studies on *Ambrosia:* III. Pistillate *Ambrosia elatior* × *A. trifida* and its bearing on matroclinic sex inheritance	*K. L. Jones*	226–232

49283

		PAGE
Effects of temperature on rubber accumulation by the guayule plant	*James Bonner*	233–243
Nature and rate of development of root system of *Lepidium draba*	*J. C. Frazier*	244–250
Germination of the nuts of the tung tree as affected by penetrants, substrata, depth of planting, and storage conditions	*C. B. Shear and H. L. Crane*	251–256
Fruit shape of watermelon as affected by placement of pollen on stigma	*L. K. Mann*	257–262
Megagametophyte of *Clintonia*	*F. H. Smith*	263–267
Histological and cytological responses of roots to growth-regulating substances	*W. M. Carlton*	268–281
Enhanced auxinic activity of tomato tissues in presence of l-tryptophane	*G. K. K. Link and Virginia Eggers*	282–284
Frequency of polyembryony in *Fraxinus* seeds	*G. P. Steinbauer*	285
Anatomy and sorus development of *Camptosorus rhizophyllus*	*Barbara F. Palser*	289–303
Sporulation in *Saccharomyces cerevisiae*	*C. C. Lindegren and Gertrude Lindegren*	304–316
Autolysis and sporulation in the yeast colony	*C. C. Lindegren and Elizabeth Hamilton*	316–321
Photoperiodicity of *Baeria chrysostoma*	*E. Sivori and F. W. Went*	321–329
Cytology and microchemistry of nuclei in developing seed of *Echinocystis macrocarpa*	*Flora M. Scott*	329–338
Cytological and taxonomic studies in the genus *Brodiaea:* II.	*Madeline P. Burbanck*	339–345
Nature and rate of development of root system of *Centaurea picris*	*J. C. Frazier*	345–351
Effect of varying nutritional treatments on growth and rubber accumulation in guayule	*James Bonner*	352–364
Extent of auxin-precursor hydrolysis in different *Avena* assay methods	*G. S. Avery, Jr., J. Berger, and B. Shalucha*	364–369
Apospory and apogamy in a species of *Tectaria*	*W. N. Steil*	369–373
Peculiar antherozoids of a species of *Chara*	*W. N. Steil*	373–374
Cytogenetic studies on *Talinum* and *Portulaca*	*Erich Steiner*	374–379
Effects of high salt concentrations on growth of bean plants	*H. G. Gauch and C. H. Wadleigh*	379–387
Mycorhizas of filbert and walnut trees in Oregon orchards	*C. E. Schuster, R. E. Stephenson, and Wm. Evenden*	388–392
Boron deficiency and the ascorbic-acid content of tomatoes	*C. B. Lyon and R. Q. Parks*	392–393
Anatomical responses of tomato stems to variations in the macronutrient anion supply	*C. B. Lyon and C. R. Garcia*	394–405
A method of numerically evaluating areas of plant tissue	*A. Geraldine Whiting and J. W. Mitchell*	405–408
Winter hardiness in juvenile and adult forms of certain conifers	*V. R. Gardner*	408–410
Correlation between internal surface and transpiration rate in mesomorphic and xeromorphic leaves grown under artificial light	*F. M. Turrell*	413–425
Effects of variation in nutrient solution on growth of sunflower plant	*S. V. Eaton*	425–435
Thermoregulation in the experimental greenhouse	*K. S. Chester and W. W. Ray*	435–437
A chamber for growing plants under controlled conditions	*K. C. Hamner*	437–441

		PAGE
Anatomical responses of tomato stems to variations in the macronutrient cation supply	*C. B. Lyon and C. R. Garcia*	441–456
Morphological identity of the velamen and exodermis in orchids	*C. J. Engard*	457–462
Nature and rate of development of root system of *Apocynum cannabinum*	*J. C. Frazier*	463–470
Some telemorphic effects induced in sweet pea by application of 4-chlorophenoxyacetic acid	*J. M. Beal*	471–474
Polyethylene glycols as carriers for growth-regulating substances	*J. W. Mitchell and C. L. Hamner*	474–483
Species of *Botrydium* from northern India	*M. S. Randhawa*	483–486
BRIEFER ARTICLE		
Maintaining the surface of hones	*Martin Hawrylow*	115
